# MENTAY 2000

**Plan ahead – include Mentay Turf Equipment in your budget. Enjoy success in turf wicket preparation!**

Safety – Controls are easily accessible, there is a wide view for the operator, single lever power steering. Braking occurs automatically when in neutral, hand brake is fitted.

Perfect weight ratio for wicket preparation, the Mentay 2000 weighs 1660kg approximately fully ballasted and with a tare weight of 860kg, some even have rear roller concrete fitted.

The new “ride on” Mentay 2000 has been designed specifically to meet the demands for a middle of the range roller, to assist you in the preparation and management of first class turf wickets.

In this competitive world, we have priced our unit to suit your budget, so include one in your budget today.

**PRIMARY SHAFT** - is a safety measure that prevents damage to the hydraulics

## For good turf wickets

It is essential that a turf wicket be prepared so that it is durable enough to withstand the length of play. Generally the pitch should provide for consistent, regular “bounce”. Such a pitch is normally truly level, grassed but finely mowed, hard, flat and well consolidated. The pitch should be well sealed and grass roots should bind it well. It may have a glistening, whitish appearance and possibly a green tinge.

The resultant bounce of a well-delivered cricket ball is greatly dependent on the hardness and density of the turf wickets playing surface. The best pitches in the world are created using Mentay Turf Care Equipment.

*Extract – Sports Grounds and Turf Wickets by Karl Liffman*

### Specifications

- Motive Power Petrol Engine 4000 rpm std
- Ask about Diesel 4000 RPM
- Breather Fill for Hydraulic Oil
- Steering Wheel – Hydraulic
- Suction Oil Filter
- In Line Filter – Prince
- Transmission Sunstrand P – 15
- Bearings are all of the shelf components
- Drive Chain 3/4 Simplex Sprockets
- Hydraulic Motor – OMR160
- Power Steering Cylinder 200mm Stroke x 50mm 1 inch
- Top Link Joints both ends
- Braking (disc) Type
- Hydraulic Reservoir has 20 litres of Tellus 46 – Castrol (Hyspin 46)
- Front and Rear Removable Scraper Blades 900m x 74 x 10m
- Steel Galvanised

### Shipping Dimensions

2.8m long x 1200mm wide x 2100mm.  
1800mm without sunshade.

### Lifting Points

4 Craneage Points are provided for unloading or lifting purposes.

### Roller Weight

Perfect weight ratio for wicket preparation, the Mentay 2000 weighs 1660kg approximately fully ballasted and with a tare weight of 860kg, some even have rear roller concrete fitted.

### Drum Dimensions

900mm wide x 900mm diameter Front 900W x 600L  
We have 8mm Drums as well as 6mm Drums.

**Plan ahead** – Include Mental Turf Equipment in your budget! Enjoy success in your budget! Enjoy success in turf wicket preparation as so many other organisations have.

The latest roller in Mentay's stable is yet another example of our quality range of Turf Care innovations

The latest revolutionary ride-on roller has been developed specially by our Design division in order to meet demands for a middle of the range roller.

The **Mentay 2000** ride on unit will also prove to be a winner. The unit comprises a roller width of 900mm and being a dual barrel roller, both barrels may be ballasted according to specific weight requirements. The tare weight is only 860kg, but with water ballast the **Mentay 2000** can weigh anything up to 1660kg.

The **Mentay 2000** control of speed may be varied from between a very slow to a fast walking pace. The operator has a clear view thanks to a number of observation points which allow the operator greater vision when rolling wickets.

Other features include greater operator comfort and the option of using either a petrol or diesel motor.

- Easy to operate with smooth forward and reverse movements
- Variable in weight
- Variable speed – from very slow to a fast walking pace
- Extremely reliable and effective

In this competitive world we have priced our unit to suit your budget, so include one in your budget today!

As a policy of Mentay Steel Fab Constructions Pty Ltd in line with product movement, we may introduce modifications to the 2000 series roller from time to time and consequently the details given in this leaflet are subject to alteration without notice.
